Meet Partable

Fast Parts Identification → Self-Service Sales → Less Downtime

The AI-Powered Visual Solution built for food processing equipment manufacturers to drive spare parts excellence in after-sales

CDS Visual Platform

CDS Partable™   CDS Mentor™   CDS CPQ

Why Partable?

AI-Powered Visual Part Identification for All
Instantly find the right part using visually interactive models with smart search to reduce errors and speed up ordering.

Digital Thread for Accurate 2D or 3D Digital Catalogs
Automated parts data ingestion and enrichment create a digital thread across systems, ensuring up-to-date info is always available.

AI Extraction Digitizes Existing Parts Manuals
Quickly turn legacy PDF part manuals into digital catalogs using our AI-powered data extractor.

3D Exploded Views & Hotspots
Convert existing CAD assets and BOMs into an interactive 2D or 3D exploded parts catalog with hotspots to facilitate precise part identification.

Seamless, Self-Service Ordering for Any Channel
Empower customers, partners, and internal teams to order parts quickly and easily, anytime, anywhere.

Real-time Data with Actionable Insights
Gain visibility into parts usage, demand trends, and customer behavior to optimize inventory, forecast sales, and identify new opportunities.

Enterprise-Grade Integrations
Seamlessly connects with ERP, PLM, eCommerce, and other critical systems through standard connectors and robust APIs.

Designed for Manufacturers, by Manufacturers
Purpose-built for real industrial needs, where every feature and functionality addresses real manufacturing challenges.

Minimize Unplanned Downtime
Fast, accurate orders and fewer mistakes help keep unplanned downtime minimal and build customer trust and loyalty.

Online and Offline Mode
Support all users wherever they are to identify and procure the right spare part, regardless of internet connectivity or device.

Drives Measurable Revenue Growth
Our food processing equipment manufacturing customers increase genuine spare part sales by up to 25% while reducing costs by up to 40%.

Sell Spare Parts In Any Channel 24/7
Sell spare parts across channels with 24/7 digital access for end customers, authorized dealers, portals, or through ecommerce.

Trusted by Food Processing Equipment Manufacturers
Leading food processing and packaging equipment manufacturers rely on CDS Partable to power their digital spare parts business.

Built with Enterprise-Grade Security Standards
Hosted on AWS for enterprise-grade security standards and SOC 2 Type II compliance for data protection and regulatory peace of mind.

Trusted by
Food Processing Equipment Manufacturers

"Since implementing CDS Partable, our team has been able to identify and fulfill genuine spare parts orders with unprecedented speed and accuracy. We've seen a 20% increase in genuine sales and a dramatic drop in costly order errors and returns. It's been a game-changer for our business."

Head of Aftersales
Industrial Manufacturer of Food Processing Equipment.
